

Patinas

Each design is offered in any of the nine patina finishes pictured above. The photos give a close representation of the patinas; however the various elements of time, touch and climate work together with the bronze to create a unique hue. Each piece, then, distinctly reflects its surroundings.

Textures

New to the Designer Collection are these seven solid bronze motifs varying in style from a faux-bois wood grain to a symmetrical tufted pattern. Patinas may be combined to create a unique look ranging from cool, modern silvery tones to warm, deep brown earthy hues.

BASIC
